2. Reason for asset acquisition and leasing

The decision was made to acquire the to-be-acquired asset, in an aim to secure stable revenue over the medium to long term and achieve steady growth of assets under management as provided in "Basic Policy for Asset Management" in the Articles of Incorporation.

Tosei Reit has evaluated the following characteristics in deciding the acquisition.

Property	Property name	Characteristics of location and property
Rd-43	T's garden Nishiterao	• The property is located approximately a 15-minute walk from Namamugi Station on the Keikyu Line and approximately a 18-minute walk from Ōguchi Station on the JR Yokohama Line.
		• Transportation and living convenience are relatively favorable, as the property is near a national highway and convenient facilities for daily living are also located near the station and along the main streets Furthermore, the property is on a southward-facing slope, and due to factors such as the building layout and surrounding usage conditions, many units have excellent natural light, views, etc.
		• When first built, the property was used as company housing, but Tosei Corporation, the seller, carried out extensive upgrades and converted it into general apartment housing with facilities and specifications aligned with three themes: preserving greenery, preventing disaster and crime, and saving energy and resources.
		• The property consists of five buildings. In the residential section, there are 87 units of the same type (91.04 m², 3LDK), which all have a storage room as well. Parking spaces are provided for a total of 96 vehicles, which exceeds the number of units.

Through the acquisition of the to-be-acquired asset, the Tosei Reit portfolio will expand to 61 properties totaling JPY 82.0 billion in terms of acquisition price.

Furthermore, the asset acquisition constitutes a transaction with a related party under the Investment Trusts Act or a related-party transaction as provided in the Asset Management Company's related-party transaction rules. In such cases, the anticipated acquisition price has been premised on being at or below the appraisal value (as defined in "3. Description of the to-be-acquired assets and leasing schedule" below) and has undergone verification by the Asset Management Company, such as calculation of assumed NOI (as defined in "3. Description of the to-be-acquired assets and leasing schedule" below) to be generated from the to-be-acquired assets. As a result of conducting said evaluation of the profitability of each of the to-be-acquired assets, the acquisition of the to-be-acquired assets was judged to meet the investment criteria of Tosei Reit, and the anticipated acquisition price for the to-be-acquired asset was deemed to be appropriate.

In addition, as stated in the "Report on Management Structure and Systems" dated July 28, 2023, Tosei Reit has set as tenant selection criteria that tenant occupancy be determined by taking into account the attributes, creditworthiness, business category, use purpose, leasing

agreement terms and conditions, tenant replacement potential and other factors in a comprehensive manner. The lessees of the to-be-acquired asset are deemed to meet the tenant selection criteria set by Tosei Reit.

(7) About "PML value"

Tosei Reit has an evaluation of seismic risk analysis conducted by Sompo Risk Management Inc. at its request as part of due diligence upon acquisition of the to-be-acquired asset. The analysis evaluates a building's seismic performance by an independent structural evaluation method based on structural drawings and structural calculation documents, which is then weighed against the content of structural calculation documents to arrive at the building's final seismic performance evaluation. The building's specific seismic vulnerability based on such evaluation is considered and seismic hazards and ground conditions are factored into for a comprehensive evaluation, based on the results of which a building's seismic probable maximum loss (PML) value is calculated. "PML value" is the to-be-acquired asset's building PML value stated in the "seismic PML evaluation report" prepared by said company. The statements in the seismic PML evaluation report are no more than an indication of the opinion of the reporting party, and Tosei Reit does not guarantee the accuracy of the content thereof. There is no special vested interest between Sompo Risk Management Inc. and Tosei Reit or the Asset Management Company.

- "Annual rent" is the amount annualized by multiplying by 12 the monthly rent (limited to the rent of rental units, including common area maintenance charges, but excluding warehouse, signboard, parking lot, etc. usage fees; the same applies hereinafter) for the building indicated in lease agreement for the to-be-acquired asset (limited to those occupied as of November 30, 2023). Also, free-rent (free of rent) as of the same date is not taken into consideration. In addition, even if there is a notice of termination of lease agreements with end-tenants, the notice are not taken into consideration for "Total number of tenants," "Annual rent," "Security and guarantee deposits," "Total leased area", "Occupancy rate" etc. in the case of agreements that are ongoing as of November 30, 2023.

- "Occupancy rate" is the ratio of the total leased area to total leasable area for the to-beacquired asset.
